SHIPPING & RETURNS

International Orders

We use International Express Service for all international deliveries. Please allow around 5-12 working days from dispatch. Additional delays may occur during the months of September - March due to the high demand and heavy load on postal services and customs. We are not responsible for loss or damage of your order in transit. This responsibility is passed on to you as soon as we hand your order over to the shipping company. International orders might be subject to import taxes/duties. For information, please contact your local customs authority. Any such taxes are the responsibility of the parcel recipient and are not paid by us.

Cancellations

Should you wish to cancel your order, you must email us immediately. 30% cancellation fee applies. Majority of orders are dispatched within 1-2 days from the order date. Shipped orders cannot be cancelled.

Returns

In the unlikely event of manufacturing faults, we would replace/repair the products at no cost to the customer. To return an item, you must email us and inform us of the reason. We will then provide you with further instructions. Goods must be returned within 8 days of receipt date - unworn and contain all the original packaging and labels. We will credit your original method of payment, excluding 25% re-stocking/processing fee and US\$30 return fee. All shipping costs associated with the return of goods are the responsibility of the consumer.

Exchanges

To exchange a product, you must email us and inform us of the reason. We will then provide you with further instructions. The goods can be exchanged within 8 days of the receipt date provided they are unworn and in the original condition with all the original packaging and labels. When returning an item for an exchange, please ensure that your name, address, phone number and instructions are clearly indicated. All shipping costs associated with the exchange of goods are the responsibility of the consumer. We strongly recommend that you use traceable shipping, as we will not be responsible for any lost parcels. For overseas orders this process can take up to 30 days.

Shipping & Returns

FREE Shipping:

Unlike many other web sites, rayban--sunglasses.co.uk offers free shipping on all domestic orders placed on our website, with no minimum order sizes or special exceptions.

Just because shipping is free doesn't mean it should take a long time. rayban--sunglasses.co.uk understands that getting your items quickly is important to you, so we make every effort to process your order quickly. When you order from our website, you can expect to receive your order within 1-9 business days.

rayban--sunglasses.co.uk Quality Control From Sourcing to Delivery

— whether as a wholesaler, distributor, or someone who's just looking to buy the latest gadget — our products are streamlined into a system that checks and double checks quality, from sourcing to delivery.

On this page:

- Sourcing your products
- Processing your product order
- Testing your products
- Packing your products
- Tracking your products
- Return policy

Sourcing Your Products

While you're sitting in the comfort of your own office or home to browsing on rayban--sunglasses.co.uk huge range of products, we're already busy selecting the best products at the best prices, all with you, the customer, in mind. With offices in US and HK, rayban--sunglasses.co.uk works with the best and most trusted manufacturers throughout, selected for quality of their products, reputation, reliability, and whether they share our passion for serving customers like you.

After a rigorous inspection and vetting process of the products we know shoppers are interested in, we make them available to you at unbeatable prices, since we source them straight from the manufacturer.

Processing Your Product Order

Upon clicking "Complete Order," your friends at rayban--sunglasses.co.uk spring into action and immediately begin processing your order. One employee reviews the details of your order, checking for anything that might delay processing, while another speeds off to pull the inventory from our shelves. Meanwhile, an email confirmation of your order will have already arrived in your inbox.

Testing Your Products

Even though our suppliers are all trusted manufacturers of quality items, we don't take any chances with your specific order.

Everything is first routed to our International Distribution Center where a highly-trained inspection team evaluates your products based on strict protocols and inspection requirements. And our requirements are high: only 80 percent of initially selected products are given our stamp of approval at this stage.

Did we get your order right? Before we begin packing, we do a thorough check to match orders correctly.

Our own Quality Control team then gives your product another inspection, inside and out, following strict protocols and requirements.

If the product meets our standards, we give it our stamp of approval. It's now ready to be shipped off to you!

Packing Your Products

rayban--sunglasses.co.uk packaging and delivery team runs like clockwork, even if we do say so ourselves. Items are always carefully inspected for any manufacturing and design defects before they're shipped off to ensure that the item you fell in love with online is the item you receive from our courier. Our team members check order slips with the original online purchase

confirmation, and then review the product pulled from the shelf to make sure it checks out with the product listed.

Then, and only then, does the team move on to packaging the order, doubling-up (and often more) on the bubble wrap and tape. Next, it's out the door in safe hands with our trusted and verified couriers.

Tracking Your Products

Once your product leaves our doors, we are still here to help. rayban-sunglasses.co.uk Customer Service team is always working behind the scenes to address your every need and query. We track your shipments and are available at your convenience to answer any questions, whether by live chat or through My Orders Mailbox. No matter the issue, we're always here to serve you.

The Ray-Ban sunglasses story begins with an explorer called, Lieutenant John MacCready, who after returning from a balloon flying adventure, complained that his eyes are affected by the permanently harmful sun glare. He got in touch with Bausch & Lomb (the founders of Ray-Ban) setting them the challenge to engineer sunglasses that would offer protection but also look stylish. On May 7, 1937, Bausch & Lomb took out the patent. The prototype, known as "Anti-Glare", had an ultra-light frame weighing in at just 150 grams. The Ray-Ban sunglasses story begins with an explorer called, Lieutenant John MacCready, who after returning from a balloon flying adventure, complained that his eyes are affected by the permanently harmful sun glare. He got in touch with Bausch & Lomb (the founders of Ray-Ban) setting them the challenge to engineer sunglasses that would offer protection but also look stylish. On May 7, 1937, Bausch & Lomb took out the patent. The prototype, known as "Anti-Glare", had an ultra-light frame weighing in at just 150 grams. They were constructed of gold-plated metal with green lenses constructed of mineral glass to block out infrared and UV rays.

The Ray-Ban sunglasses story begins with an explorer called, Lieutenant John MacCready, who after returning from a balloon flying adventure, complained that his eyes are affected by the permanently harmful sun glare. He got in touch with Bausch & Lomb (the founders of Ray-Ban) setting them the challenge to engineer sunglasses that would offer protection but also look stylish. On May 7, 1937, Bausch & Lomb took out the patent. The prototype, known as "Anti-Glare", had an ultra-light frame weighing in at just 150 grams. They were constructed of gold-plated metal with green lenses constructed of mineral glass to block out infrared and UV rays.

The Ray-Ban sunglasses story begins with an explorer called, Lieutenant John MacCready, who after returning from a balloon flying adventure, complained that his eyes are affected by the permanently harmful sun glare. He got in touch with Bausch & Lomb (the founders of Ray-Ban) setting them the challenge to engineer sunglasses that would offer protection but also look stylish. On May 7, 1937, Bausch & Lomb took out the patent. The prototype, known as "Anti-Glare", had an ultra-light frame weighing in at just 150 grams. They were constructed of gold-plated metal with green lenses constructed of mineral glass to block out infrared and UV rays.
